

Healthcare Garden Design

Professional Development Certificate Program

“The program has enriched me both professionally and personally. I will always treasure those eight days as a wonderful learning experience that truly opened my eyes and mind to all the possibilities of TRUE healing garden environments.”

—Graduate, 2009

“...it was one of the most rewarding experiences of my life, and I know that the people I met, and what I learned will truly benefit me in my endeavors to help others to find joy and healing in the garden.”

—Graduate, 2012

“This course renewed my spirit!
Content was incredible. No repetition.
Each speaker was valuable.”

—Graduate, 2013

Healthcare Garden Design

Professional Development Certificate Program

May 14 – 21, 2014

CHICAGO BOTANIC GARDEN
JOSEPH REGENSTEIN, JR. SCHOOL

Healthcare Garden Design Professional Development Certificate Program

From May 14 through May 21, 2014, attendees at the Healthcare Garden Design Certificate Program will discover the many ways gardens provide verifiable health benefits for their patients, clients, staff, and visitors.

The multidisciplinary program will introduce attendees to the latest research demonstrating the benefits of healthcare gardens, while providing participants with the expertise, knowledge, and tools to effectively design, manage and evaluate such gardens.

The eight-day program begins with a special full-day seminar, Gardens that Heal: A Prescription for Wellness, designed as a starting point for those participating in the full program and an introduction for professionals not requiring full certification.

Gardens That Heal: A Prescription for Wellness

This daylong seminar provides an overview of the rapidly growing and changing world of healthcare garden design. Gardens That Heal: A Prescription For Wellness is ideal for those seeking a one-day introduction to healthcare garden design, while also serving as a critical starting point for the eight-day, in-depth certificate program.

The one-day agenda includes special presentations designed to energize your organization's healthcare garden design program.

Industry-Leading Instructors

The Chicago Botanic Garden's Regenstein School has brought together some of the nation's most renowned experts in the field of healthcare garden design and research.

Clare Cooper Marcus, professor emerita, Departments of Architecture and Landscape Architecture, University of California; principal, Healing Landscapes, Berkeley, California. Internationally recognized for pioneering research on the psychological and sociological aspects of architecture and landscape design.

William Sullivan, Ph.D., professor, Department of Landscape Architecture, University of Illinois at Urbana-Champaign; president, Council of Environmental Deans and Directors. He focuses his attention on issues related to environmental sustainability and the role of public institutions in creating a sustainable world.

Jack Carman, FASLA, president, Design for Generations, Medford, New Jersey. Specializes in creating therapeutic exterior environments for senior communities and healthcare facilities, including assisted living and Alzheimer residences, long-term care facilities and continuing care retirement communities in more than 12 states.

Mark Epstein, ASLA, principal, Hafs Epstein Landscape Architecture, Seattle, Washington. Served as co-chair of the Therapeutic Garden Design Professional Practice Network for the American Society of Landscape Architects. Teaches therapeutic site design at the University of Washington.

Barbara Kreski, MHS, OTR/L, director, horticultural therapy service, Chicago Botanic Garden. Spanning a wide range of clinical settings from psychiatric and Veterans Administration Hospitals to public schools and pediatric rehabilitation; she brings an understanding of the breadth of human disabling conditions.

Gwenn Fried, manager, Horticultural Therapy Services Department, N.Y.U. Langone Medical Center, New York, New York. A horticultural therapist at the Glass Garden since 1997 and curator of the Rusk outdoor gardens, she focuses on the anthropological uses of plants

and weaves these lessons into classes for seniors and children.

Marni Barnes, LCSW, ASLA, APATH, principal, Deva Designs, Palo Alto, California. Creates and consults on therapeutic landscapes, drawing upon ten years of experience as a psychotherapist, as well as 30 years as a landscape designer. Currently Barnes is working with Miyagi University to restore tsunami devastation in eastern Japan and with the Royal Government of Bhutan on the Centre for Gross National Happiness.

Nilda Cosco, Ph.D., is education specialist; research associate professor, College of Design; co-founder, Natural Learning Initiative, N.C. State University. Primary research interest is the impact of outdoor environments on child and family health outcomes, as they relate to natural components of the built environment.

Naomi Sachs, ASLA, MLA, founder and director, Therapeutic Landscapes Network, principal, Naomi Sachs Design, a design and consulting firm focusing on landscapes to facilitate health and well-being. Sachs is collaborating with Clare Cooper Marcus on a book about therapeutic landscapes, to be published by John Wiley & Sons in 2013.

Geoffrey Roehll, ASLA, senior vice president, Healthcare Design Team, Hitchcock Design Group, Naperville, Illinois. Since joining Hitchcock Design group in 1990, Roehll has directed many landmark projects in the healthcare market. He is now focused exclusively on healing environments and practices evidence-based design.

Robert Hoover, ASLA, principal, HBLA, Inc., Portsmouth, New Hampshire. Specializes in healthcare, senior living, and residential projects, with HBLA designing more than 100 healthcare related projects throughout the Northeast.
