

Garden Quest: Explorer

Try to find the items below and mark the boxes with an X when you find something. Depending on the time of year, you might not be able to find all of these outside.

Today's weather

Season

Count 10 different **living** things you notice.

Draw marks in the ten-frame or make tallies!

Smell a **flower** and tell someone what it smells like.

Count 10 different **non-living** things you notice.

Draw marks in the ten-frame or make tallies!

Find a **stem** that is taller than you.

Notice a **leaf** that has two different colors.

Observe a plant with **roots** above the ground.

Look for a plant that you think **wasn't** planted by a human. Tell someone how you think it got there.

Notice & Wonder

Scientists are always noticing the world around them and asking questions.

As you explore, use the chart below to draw or write what you notice and what you wonder.

I Notice...

What do you see?

Example: I notice a plant with spiky leaves.

I Wonder...

What questions do you have?

Example: I wonder why the plant has spiky leaves.
Maybe it is to keep itself safe from predators.
